

We like to call our Northwest Territories paddling rivers **world class wilderness gems.**

From mild to wild the Northwest Territories has every kind of freshwater adventure you can imagine.

We have spectacular mountain rivers that cut through canyons and wind around rock faces. We have rivers that meander across the barrens, home to distinctive northern wildlife. We have one of the longest rivers in Canada, the most northerly paddling river on the continent and dozens of rivers that connect lake systems within the boreal forest. For more information visit spectacularnwt.com and check out our paddling adventures.
