

# PACK LOTS OF EXTRA ADJECTIVES.

The Northern Lights are like fireworks on a cosmic scale. And the best place to see the show is Canada's Northwest Territories. Snuggle into your warm parka, lean back in your deck chair or just look up at this surreal explosion of light and colour. As you watch the sky become a living canvas of colour, you understand why people come here from all over the world to see one of the planet's greatest natural wonders. On display mid August until early April.
